

Calculus in 5 Hours: Concepts Revealed so You Don't Have to Sit Through a Semester of Lectures

by Dennis Jarecke

Students often struggle to understand Calculus and get through their first Calculus course. And to make things worse, many textbooks reach a whopping 1,000 pages to introduce this crucial subject, needlessly frustrating and overwhelming students. *Calculus in 5 Hours* develops the confidence you need in approximately 124 pages.

The problem is that assigned textbooks give exhaustive explanations of every proof and theorem in Calculus. But too many details can impair learning by creating doubt and uncertainty in your ability to understand. What's needed is a straightforward guide to give you the basic concepts.

Calculus in 5 Hours covers roughly 75% of a first-semester course and leaves out the extra material that adds little value in learning Calculus itself. Instead of being a comprehensive textbook, it gives you a straightforward and simple explanation of Calculus that can be absorbed in less than a day, strengthening your knowledge and confidence at the same time.

Trade Paperback Edition

ISBN: 978-0-9995254-1-8

Price: \$9.99

Binding: 6x9 perfect paperback

Page count: 147

Clarion Review ★★★★★

“This easy reading self-help book distills complex mathematical concepts into simpler, easier-to-digest bullet points for the mathematically challenged or for those needing a quick review of the subject.”
